INTERNATIONAL DATA
SPACES ASSOCIATION

Smart Connected Supplier Network

Roadmap meeting, October 15th 2021

Objective of this Meeting

Smart Connected Supplier Network

- Develop Roadmap 2022 – 2025
 - Board & Supervisory Board are the owner of the roadmap
 - Following pages are suggestions, **your input is needed!**
 - Identify focus areas in order to draft full roadmap
- Agree on next steps to formalize roadmap

A green arrow pointing to the right, positioned to the left of the 'Agenda' title.

Agenda

Smart Connected Supplier Network

- 4 Focus Areas
- Current Status
- Roadmap 2022 - 2025
- Focus 2022

4 Focus Areas

Smart Connected Supplier Network

We aim to develop SCSN further in broadly the following areas:

- 1. Organizational**
- 2. Service Offerings**
- 3. Technical Infrastructure**
- 4. Growth Ambitions**

Separately, we highlight the innovation activities related to SCSN.

2021 Roadmap and current status

Growth ambitions

	2020	2021	2022
Organisation	Transition from project to SCSN Foundation.	NL: Strategic partnerships with branche organisations. EU: Strategic partnerships to accelerate growth.	
Services	Comprehensive SCSN message set for manufacturing industry.	EU: Develop and integrate additional (AI) products and services for supply chain optimisation, condition based maintenance, etc.	
Infrastructure	Fully operational IDS infrastructure for Service Providers.	EU: Extend trusted network with advance security features e.g. usage control and ensuring interoperability with other data spaces.	
Connections	Growth to 400 connected manufacturing companies.	NL: 1.000 connections EU: 250 connections	NL: 2.000 connections EU: 1.000 connections
Service providers	Growth to 10 approved SCSN Service Providers.	NL: 15 Service Providers EU: 5 Service Providers	NL: 20 Service Providers EU: 20 Service Providers

Current Status

Smart Connected Supplier Network

The current status for each focus area is:

1. Organizational

- Legal grounding foundation completed
- Service Provider Contract agreed (with basic SLA, compliance policy)

2. Service Offerings

- Comprehensive message set is operational
- Working on extending Order 'Additional Services' and Resilience
- No urgent open issues anymore regarding the messages

Current Status - Continued

Smart Connected Supplier Network

3. Technical Infrastructure

- Test & Production environment hosted by TNO
- Outsourcing discussions with KPN and IBM

4. Growth Ambitions

- 8 service providers, 10+ interested service providers
- 50+ members via IDS via four service providers, other service providers are in the final stages of integrating IDS.

Current Status – Innovation initiatives

Smart Connected Supplier Network

- **Fabriek van de Toekomst - Schakels in de Keten** - Develop a communication standard and community such as is realized in SCSN. This project will end 2021.
- **MARKET4.0** - Improve supply chain transparency. Strong links to International Data Spaces.
- **Metaalhuis/DVC-SI** - Market exploration of SCSN offerings.
- **EUR3KA** - Creating resilient supply chains which can quickly respond and adapt to significant variations in demand.
- **DASLOGIS** - Creating interoperable data spaces in The Netherlands.
- **DIH4AI** - Strengthening the collaboration between DIHs in Europe.
- **EUHubs4Data** - Aims to create a network of DIHs. Possible ways to help new service providers join SCSN.

Roadmap 2022-2025

1. Organizational
2. Service Offerings
3. Technical Infrastructure
4. Growth Ambitions

Upcoming Innovation Activities

1. Roadmap – Organizational (Part I)

Smart Connected Supplier Network

- Operations / staff functions (e.g. marketing) to be effectuated
 - Community Manager role
 - Setup of internal collaboration system
 - Formalize release management & versioning schedule for both messages and infrastructure
 - Formalize due diligence process
- Investigate expectations of members wrt SCSN Foundation
 - Is the way of working wrt Working Groups known and accepted?
 - What kind of support is expected / needed from service providers?

1. Roadmap – Organizational: Outreach

Smart Connected Supplier Network

Marketing & communication

- Strengthen marketing team and marketing plan
- Creating a strong online presence on LinkedIn & website
- Better embed in existing frameworks such as Smart Industry, Technow,..
- Support SCSN market research by Metaalunie/IPL
- Orchestrate communication efforts by service providers/end-users/sector organizations.
- Visiting trade shows/fairs or other ways to promote SCSN

2. Roadmap - Service Offerings

Smart Connected Supplier Network

- More / different messages (for example measuring data / process data)
 - Utilize innovation projects (e.g. DASLOGIS, EUR3KA, DIH4AI) to work on specific improvements (e.g. resiliency).
 - Increase support and usage of current message sets.
 - Support of advance ordering flows (i.e. better handling of exceptions)
- Support of other services on top of the infrastructure to further improve scalability.
 - The translation of messages *as a service*
 - Connecting of a third-party platform/company *as a service*.

2. Roadmap - Service Offerings: Third party services

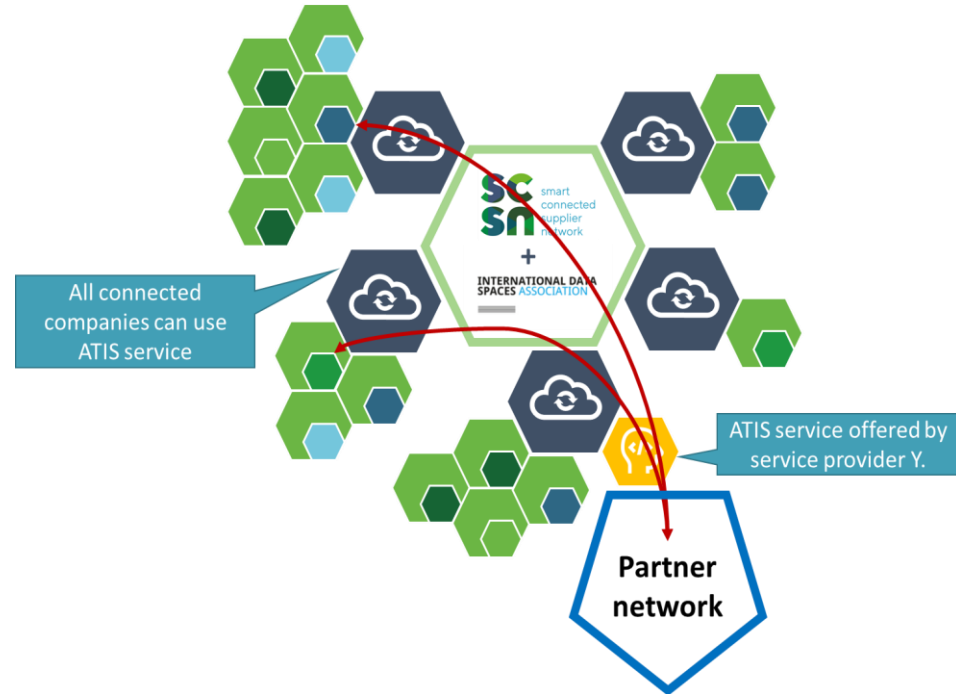

Smart Connected Supplier Network

Example scenario:

1. Service provider X offers integration with a third-party platform/partner: e.g. ASML SAP Ariba, S@les in de bouw,...
2. Service provider X publishes the service
3. Service provider Y makes an agreement with X to use the service.

The service can now be used by a larger group of end-users.

Not all service providers need to integrate all third-party integrations.

3. Roadmap - Technical Infrastructure

Smart Connected Supplier Network

- Take over hosting by commercial party
 - Now discussion with ao KPN to take over hosting. Agreement expected early next year.
- Eager to welcome the 10th service provider, with also international candidates.
 - Expansion strategy is focused on Germany and Belgium.
- Drafting position paper on (IDS/GAIA) certification
- Innovation areas
 - Data space interoperability
 - Certification, working towards full-stack integrity

4. Roadmap - Growth Ambitions

Smart Connected Supplier Network

- Broaden targets to 'manufacturing industry' instead of 'only' high-tech in NL
- Benelux:
 - Service providers; goal 2022: 15 (3 international), 2023: 25
 - Connections to IDS; goal 2022: 200, 2023: 400
- European/International, aim to connect with:
 - Connect German service providers (e.g. myOpenFactory, SupplyOn)
 - Collaboration with other data spaces -> dataspace interoperability (for example Catena X)

4. Roadmap - Growth Ambitions - Data Space interoperability

Smart Connected Supplier Network

- IDSA report on the Governance of data space instances with a focus on **inter** and **intra** data space interoperability.
- Creation of a European Rulebook for Data Spaces.

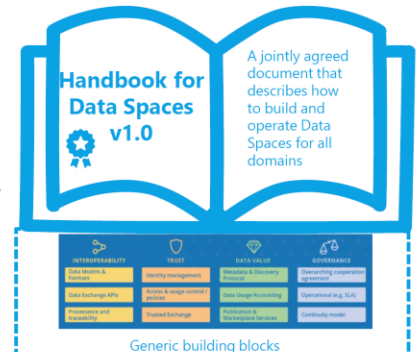

2. WHAT WILL BE CREATED

INTERNATIONAL DATA SPACES ASSOCIATION

A HANDBOOK FOR DATA SPACES THAT DESCRIBES HOW TO BUILD AND OPERATE DATA SPACES FOR ALL DOMAINS

DOCUMENTS IN SCATTERED LANDSCAPE

		Policy Rules and Architecture of Standards
		Data Sharing Canvas
		IDS Rulebook
		SITRA Rulebook
		Design Principles for Data Spaces v1.0

Handbook for Data Spaces v1.0

A jointly agreed document that describes how to build and operate Data Spaces for all domains

INTEROPERABILITY	TRUST	DATA VALUE	GOVERNANCE
Inter-Instance & Intra-Instance	Identity management	Provision & Discovery	Coordinating cooperation
Data Exchange APIs	Event & usage control	Access & Accounting	Operational (e.g. S.A.)
Interoperability & Compatibility	Shared Knowledge	Intermediation & Support	Continuity/Resilience

Generic building blocks

Non-exhaustive

GOVERNANCE FOR DATA SPACE INSTANCES ASPECTS AND ROLES FOR THE IDS-STAKEHOLDERS

4. Roadmap - Growth Ambitions - Data Space interoperability

Smart Connected Supplier Network

- Tens of IDS and GAIA-X data spaces are emerging in the next years. Focus is mostly on *data spaces 1.0*, i.e. the setup of a data space and ecosystem.
- Interconnection between data spaces is of special interest in the upcoming years as part of *data spaces 2.0*. European federation of data spaces.

Upcoming Innovation Activities

Upcoming innovation activities (pending approval)

Smart Connected Supplier Network

- **Dutch GAIA-X Manufacturing Hub** together with the Province of North Brabant, a.o. bridging the gap to Catena-X.
- **IPCEI Semiconductor** with a special stream focused on Digital Supply Chain collaboration, chaired by ASML.
- **Manufacturing Data Spaces** European initiative to strengthen and scale up data spaces in manufacturing.
- **Team Data Spaces** commits support to the EU's plan to create European data spaces that realize the full potential of data sharing in the respect of European values.
- **EUHubs4Data Open Calls** can support new service providers to join SCSN.

Next steps

Next steps

Smart Connected Supplier Network

- Finalize identification of the roadmaps key areas
- Publication of a survey for the broader SCSN community in order to validate the current roadmap activities.
- Drafting of the final roadmap based on gathered input
- Drafting of the associated budget
- Formal request for approval of the revised roadmap
